DEVELOPMENT / AMENITIES AERIAL

VICINITY MAP

MUEGGE FARMS & THE BENNETT "TOWN CENTER" AREA

Project Location: Located approximately a half-mile north of the interchange of Interstate 70 and State Highway 79, Muegge Farms Commercial features prime Commercial / Retail / Mixed Use development opportunities across nearly 60 acres in new Town Center area of the Town of Bennett.

Surrounded by active residential and commercial development, the project enjoys excellent access to existing and future transportation networks.

Town Center Framework & Connectivity: The Town Center will be an important neighborhood for the future of Bennett. Building upon the adjacent existing conditions and proposed land uses within the Town Center, these components will help form the framework for the physical layout of the neighborhood.

The proposed roadway system is intended to create a network of local streets that promotes the desired connectivity for a mixed-use neighborhood. The layout relies on existing and planned intersections on the edges of the property, with access points providing connections to the surrounding community and enabling a series of local streets that provide internal neighborhood connections.

The multi-use trail along the eastern edge of the property connects the core of the community to the growing commercial area along the I-70 corridor. The Town center plan provides an opportunity to consider additional bicycle and pedestrian routes that will foster connections to this neighborhood. Smaller block sizes within the framework will promote vibrancy of the Town Center through increased connectivity.
